CAREER OBJECTIVE

Software Engineer with 3 years of experience in primarily on backend technologies like Python, Flask, fastAPI, Django, ASP Dotnet Core, and other backend databases. Well experienced in Scrum and Agile methodologies.

EDUCATION

Btech in Electrical and Electronics Engineering

APJ AbdulKalam University

SKILLS

PROGRAMMING LANGUAGES

- ❖ Python
- ❖ c#
- ❖ HTML, CSS, JavaScript

FRAMEWORKS

- ❖ Flask
- ❖ FastAPI
- ❖ Django
- ❖ Asp DotNetCore

DATABASES

- ❖ PostgreSQL
- ❖ MongoDB
- ❖ ElasticSearch
- ❖ MySql

OTHER

- ❖ Git
- ❖ Github CI/CD Pipelines
- ❖ AWS
- ❖ Docker
- ❖ Pandas, Numpy, AI-ML

WORK EXPERIENCE

Edstem Technologies - March 2022 - February 2025

Backend Engineer – Talent Data Management system

- Talent data management system is a platform for streamline the resume processing and recruitment workflow for hiring teams using microservices architecture. The system ensures efficient acquisition by AI -Powered resume extraction and structured data storage.
- Involved in the REST API development in Flask closely aligning with the frontend team and following strict coding standards
- Optimized resume parsing accuracy by fine-tuning prompt engineering for GPT based extraction.
- Technologies used: Python, Flask, AWS, S3, EKS, ECR, Pytest, Docker, Postgres, ElasticSearch, OpenAI GPT

Backend Engineer – Warehowz Management System, USA

- Warehowz Management System is software which allows organizations to control and administer their warehouse operations from the time goods or materials enter a warehouse until they move out.
- Learned project functionalities and wrote codes based on the requirements and took ownership of developing new components which are reusable.
- Wrote proper NUnit test for the functionality of the application. Technologies: Asp.Net Core , AWS , Nunit Test , Docker , MongoDB

Backend Engineer - Bloom

- Worked as a Backend Engineer for Bloom Project, a platform for human resource management that involves microservices development, unit testing, deployment and integration
- Involved in Sprint planning for the estimation of efforts for user stories and bugs
- Development of Rest API endpoints as microservices in Flask
- Done unit testing using Pytest
- Involved in code reviews of peers
- Technologies used: Python, Flask, PostgreSQL, Docker, AWS – EKS, ECR

Certification

- RESTful API – The Complete Guide (.NET7 API) - Udemy
- NASSCOM-SSCCC(SSC/Q8113 & Q8114) in AI ML Engineer & AI Hardware engineer
- HTML, CSS, JAVASCRIPT, REACT JS -Online Course-Udemy
